

Yara Chehab

17 year old Lebanese girl diagnosed with VSD and Pulmonary Hypertension. Entered now stage 2 of the disease which can lead to death if not treated.

Currently Yara is maintained on a set of medicines (approx. 2500\$ per month) and oxygen therapy during normal days. Yara is hospitalized when symptoms are out of control.

Ultimate scenario for solving the case is heart and pulmonary transplant that costs 580,000 dollars in Cleveland Abu Dhabi Hospital. Dr. Fadi Hamed, at Cleveland, accepted Yara's case and confirmed that Yara has priority in organs donation due to her young age.

We are launching a donation campaign to collect the amount. Please find below the donations means. Donations are registered on live excel sheet and can be accessed by everyone. Link for the sheet can be found at the end of this document.

Through Whish Transfer:

76587785 (Mother Nour)

70657529 (Aunt Khayriye)

Please mention "Yara Chehab" in the transfer note.

Cash

Nour Sharab (Mother) +961 76 587 785

Ahmad Chehab (Father) +961 3 587 785

Direct Transfer to Hospital
